Awards Program Underway
by Julie Briggs
Defense Media Activity

FORT GEORGE G. MEADE, Md. – Visual information and public affairs personnel are preparing entries for their military service’s media contest with the aim of earning a top spot for their service and entry to the Defense Media Awards competition in April.

The Defense Media Awards replaces the Thomas Jefferson, Visual Information and Visual Information Production – the TJ, VIAP and VIPA – awards programs this year. There are two significant changes from last year’s awards programs: entrants must first win their service competition, and products are entered through the Defense Video Imagery Distribution System, or DVIDS.

The Air Force, Army, Coast Guard and Navy completed their contest guidelines, as has the Defense Media Activity, which sponsors the Defense Media Merit Awards competition for civilian employees assigned to combatant commands, joint task forces, defense agencies and DoD field activities – including DMA – and their team-produced products. Military members assigned to defense agencies, DoD field activities, combatant commands and joint task forces enter their individual work products to their Service’s competition.

Unlike Coast Guardsmen, Sailors and Marines who enter directly to their service competition, Airmen and Soldiers must first win in their major command’s competition to be considered at Air Force and Army levels, respectively. This means contests for Airmen and Soldiers begin as soon as January.

The Marine Corps will release its contest guidelines in early 2017.

While DVIDS is an established system, not all contestants have used it. Entrants must create an account and include their Vision ID number when doing so. They then must associate

If you have a story or idea you think should be included, please email us your content. All story submissions must follow these standards: 1) Typed in Microsoft Word; 2) All images must be in the original JPEG format, submitted separately from the Word document, with required caption, attribution and metadata; 3) No more than 350 words.

DIMOC wants to preserve your Imagery!

If your unit, ship or organization has DoD-produced physical imagery that is taking up valuable space (i.e. prints, slides, films, tapes, negatives, discs, etc.), DIMOC can digitize it and make it available to you through the DIMOC.mil web portal at no cost!

Regardless of age, such imagery is still an official DoD record, and must be properly archived according to Federal law and DoD regulations. Please do not throw it away or attempt to send scanned items to DVIDS or DIMOC. DIMOC will process your physical content using archival handling processes, digitize your physical medium, add it to the online searchable DoD archive. Once the digitization process is complete, DIMOC will offer your original records to the National Archives as a permanent Federal Record; thereby preserving your visual legacy!

For more information on submitting imagery to DIMOC, go to: www.dimoc.mil/quick/physicalimagery.html. Once you have inventoried your physical imagery, contact our archivists at DIMOC-Archivists@mail.mil.

Our team is ready now to turn your physical imagery into the high-quality digital formats you need today, while preserving the DoD's visual history for future generations.

2017 Inauguration Information

On Jan. 20, the Joint Task Force – National Capital Region (JTF-NCR), with more than 60 Joint Services visual information professionals will provide VI coverage to the 58th Presidential Inauguration through imagery. Visit the below for released content:

Modern Military’s Quandary: Personal Cameras on the Battlefield
by Lee Thomas
DVI, Chief, Policy and Programs

A tectonic shift in combat documentation recently landed military members and the Department of Defense in a policy no-man’s land. The shift began around 2009, with the introduction of the GoPro HD Hero camera. What followed was a proliferation of affordable, small video cameras designed to record and post high-impact action videos on social media. In short order, a new genre of internet action video was born, generating viewership in the millions. Military members took notice and quickly adopted the use of personal cameras to document combat action.

A search of YouTube for “US+soldier+combat+video” returns more than 15 million results with such titles as, “US Soldiers Kill Taliban in Afghanistan – Rare Combat Footage – Heavy Firefights,” “US Soldiers in Afghanistan – Rare Combat Footage – Heavy Firefights,” and “US Soldiers Kill Taliban in Afghanistan – Rare Combat Footage – Heavy Firefights.” There are hundreds of YouTube channels specializing in the military combat genre. The public can now spend hours and even days viewing military action videos that often start with disclaimers like, “Contains Scenes of Violence: Viewer Discretion Advised.”

Then the inevitable happened. Commercial media producers began to notice the popularity of these military reality videos with gut-wrenching drama and action.

They decided it would be great to weave free military action videos from the front lines into documentaries they could sell or license for a profit. Today, you can purchase documentaries like “Citizen Soldier,” from Walmart, or watch “Taking Fire” on the Discovery Channel and “The Fighting Season” on DirectTV.

In a Marine Times article in November 2015, “Your war story wanted for a new ‘Fighting Season,’” TV producer Ricky Schroder made a pitch for Marines to submit their action videos directly to his production company. According to David Evans, who handles documentaries and non-scripted entertainment requests for the Assistant to the Secretary of Defense for Public Affairs, Mr. Schroder even offered to pay up to $100 a minute for military action video in an ad he placed in the Army Times.

For DoD Public Affairs, Visual Information, or Combat Camera professionals working in the Department of Defense, watching uncleared soldier video go straight from combat to YouTube to commercial sales is a huge misdirection of government information. We now find ourselves in that previously mentioned policy no-man’s land somewhere between the operational security program, Federal ethics law, copyright law, and the First Amendment of the U.S. Constitution.

How can we move forward? What should we tell our troops about using personal cameras on the battlefield? What current DoD policies and Federal laws inform the capture, release and commercial use of these videos? In an effort to help educate and inform DoD employees and service members on the requirements and risks of using personal cameras on the battlefield, what follows is a brief overview of policies and laws.

Q: “If a service member/employee is documenting military operations but was not tasked to do so, who owns the imagery?”

As a basic premise, the service member/employee who takes the photograph or video becomes the owner of the legal copyright interests (absent an official tasking, use of government cameras, or written order/agreement to the contrary). However, there are DoD policies and other legal principles that may limit or restrict this basic premise.

First and foremost, DoD personnel should always consult their local and component-level policies for specific guidance on photographing military operations. For example, military personnel deployed within the USCENTCOM Area of Responsibility were subject to GENERAL ORDER NUMBER 1C (GO-1C), dated 21 May 2013. GO-1C defines official and unofficial photographs and prohibits photographing certain specific scenes. It also requires a non-delegable approval from a commander in the grade of 0-5 or higher before any non-government equipment can be used for official photographs or videos.

Q: “Does the service member have a right to sell this imagery?”

No, and doing so could result in Uniform Code of Military Justice or other legal action against the service member/

use personal cameras only to document personal activities or when absolutely needed to document operational activities. Consult with your local and component-level policy for guidance/restrictions. Always submit your mission-related imagery for a security review for clearance from the appropriate level of command before releasing it to public forums (including social media), or to media outlets.

**Q:** “What advice would you give to military members who want to use their personal cameras to document the battlefield?”

**Overall, the best guidance is to**

**DIMOC-Services Center Markets DVIDS 2016 Holiday Greetings**

*by Mark Martin
VI Services Center*

The DIMOC Services Center at Tobyhanna Army Depot, Pennsylvania, has taken on a marketing role to improve the visibility of the DVIDS content, starting with the 2016 Holiday Greetings.

DVIDS “holiday shout out” content – an annual tradition throughout the Department – was marketed by DIMOC to television outlets across the nation as a way to highlight local military members serving overseas during the holidays. By using the map on the DVIDS Holiday Greetings page, the Services Center team assembled lists of media outlets in each state using the CISION/VOCUS database, which is one of the DVIDS outreach tools, to create e-mail distribution lists and send out information on the greetings.

The distribution lists were used to bring attention to the stations in and around service members’ home towns, and the outreach provided registration and download instructions on accessing these products from DVIDS. This outreach effort is the first of many DIMOC-Services Center efforts to increase the public visibility of the best DVIDS and Defense Media Activity products.

---

The DVIDS website highlights service members stationed around the world by consolidating their greetings within their home states on the online map. Holiday greetings are recorded by service members and uploaded to DVIDS. These greetings are made available to media outlets across the country to highlight service members doing their duty and being away from home and family during the holidays. DIMOC-SC developed marketing efforts to get the word out about these greetings.
VI POLICY

New Actions
The Office of the Secretary of Defense issued a guidance memorandum, dated Nov. 8, 2016, titled “Guidance for Use of Visual Information Captured by Department of Defense Personnel on Personal Equipment.” The memo addresses security risks and procedures for handling and releasing VI captured by DoD personnel using their own personal cameras. The memo was necessitated by the activities of deployed personnel who recorded their mission activities and then released the imagery directly to media companies for the purpose of producing for-profit documentaries. The memo states that, “commanders at all levels should work to ensure that DoD personnel do not provide media outlets or other public forums, including social media, with any mission-related VI that has not been approved for release at a level deemed appropriate by the commander.” The memo is available at: http://www.dimoc.mil/resources/dodMisc.html

Reminder
DoD Instruction 5410.20, “Public Affairs Relations with For-Profit Businesses and Business Industry Organizations,” published Sept. 29, 2016, requires all DoD Component website VI galleries (including social media websites), regardless of domain, to prominently display the official DoD “Notice of Limitations.” DoD Instruction 5410.20 is available for download here: http://www.dtic.mil/whs/directives/corres/pdf/541020p.pdf

Under development
DoD Instruction 5040.02, “Visual Information” (Full Revision) will incorporate the Change 1 to 5040.02 published in July 2016, along with relevant portions of DoDI 5040.07 “VI Productions” (which will then be rescinded).

DoD Captioning Style Guide Updates
The DoD Captioning Style Guide is undergoing another revision, with the next edition slated for March. Most of the updates will focus on clarifications regarding metadata fields and the entry of specific metadata.

DIMOC personnel have been working with corporate partners to build and test the long-awaited DoD Captioning Style Guide mobile app. A small focus group of DIMOC personnel and military photographers reviewed initial design and functionality diagrams in early December, and a larger group will be invited to beta-test the app in February or March.

The app will be available for phones and tablets using Apple or Android platforms, and the app’s information will reside on the device, allowing use in austere environments.

The DoD Captioning Style Guide is available online at http://www.dimoc.mil/documents/styleGuide/DoD_Captioning_Style_Guide.pdf Get the word out, especially to the Public Affairs, Combat Camera and VI communities.
