Army Combat Camera learns from Hurricane Maria mission

by U.S. Army Staff Sgt. Pablo N. Piedra
55th Signal Company (Combat Camera)

The U.S. Army’s 55th Signal Company (Combat Camera), based at Fort Meade, Maryland, strives to maintain mission readiness by training Soldiers for all possible contingencies. In most cases, we have weeks to prepare for a deployment. Occasionally, however, we receive an immediate tasking with no lead time. That was the case Sept. 24, 2017, when a five-Soldier Combat Camera team was sent to Puerto Rico to cover U.S. military relief efforts after Hurricane Maria devastated the island.

I was the noncommissioned officer in charge, with Sgt. Nelson Rodriguez as team leader. Both of us had just returned from another mission just the night before. We were assigned three Soldiers, Spc. Blue Maldonado, Pfc. Kyara Aguilar and Pfc. Caitlyn Cassidy, who were pulled from a field exercise.

The team was given five hours to create a packing list, prepare equipment and assess the mission. Four of our team members speak Spanish, which proved to be a huge asset in the coming weeks.

Without knowing the conditions on the island, the location where we would operate, or even power or communications capabilities, we had to prepare for any environment. We had to pack enough uniforms, batteries, memory cards, supplies and equipment to operate in austere conditions for as long as possible.

The team was attached to the 101st Combat Aviation Brigade (CAB), unload a HH-60M Black Hawk helicopter from a C-5M-Super Galaxy aircraft at Ceiba, Puerto Rico, Sept. 27, 2017. The 101st CAB conducted medical evacuation and relief efforts to support FEMA in the recovery process of Puerto Rico after the devastation caused by Hurricane Maria. (U.S. Army photo by Staff Sgt. Pablo N. Piedra)

CONTINUED ON PAGE 2, “Lessons Learned”
(CAB), based at Fort Campbell, Kentucky. Our presence meant the 101st CAB had less room for their own supplies. Going in, we knew we would have to prove our worth to the host unit, not only in documenting the recovery efforts, but by actively assisting the 101st CAB’s efforts. This included loading and unloading aircraft, setting up camp, moving equipment and other tasks associated with humanitarian operations.

By the end of the fourth day with the 101st CAB, our group was regarded as part of the larger 101st team, and we were given unrestricted latitude to complete our Combat Camera missions.

As is typical of contingency missions such as this, our orders changed on the sixth day of the mission.

The team was moved to San Juan to support the U.S. Army North Public Affairs team, which had been put in charge of documenting all recovery efforts. The five of us quickly established ourselves as the go-to resource for completing the numerous documentation missions.

As the overall mission continued, it became clear there was one aspect we couldn’t adequately prepare for: the emotional toll. In the aftermath of Maria, Puerto Rico suffered a lot: widespread homelessness, lack of food and potable water, injuries, illness and a lack of medical assistance.

The suffering was indiscriminate, and people of all ages were subject to it.

We quickly learned to lean on each other in order to express our personal feelings about what we witnessed, and it helped us cope and continue the mission.

Once the team returned to Fort Meade in late October, an after-action review (AAR) served as a reminder Combat Camera needs to be ready to go at all times. Among the salient points from the AAR:

- Ensure all Soldiers’ field equipment is packed and ready to go at all times.
- Check camera equipment – including adequate memory cards and charged batteries – weekly.
- Ensure Soldiers can live in austere conditions for an indefinite time.
- Always be prepared to share the burdens of the host unit.
- Always be prepared for a change in mission or specific event.
- Provide team members with emotional support and down-time to maintain morale.

Hurricane Maria created havoc on the Island of Puerto Rico, and the opportunity to document the relief efforts, to help the people of the island, to work as translators and render aid in any way possible was a huge honor to our team, and it’s an experience each one of us will always cherish. Eyes of the Army, Combat Focus.

The Military Services are preparing for their media awards contests. Winners of the Army, Navy, Marine Corps, Air Force and Coast Guard competitions will compete in the DoD-level Defense Media Awards competition scheduled for April.

DoD civilian employees assigned to combatant commands, joint task forces, defense agencies and DoD field activities, including the Defense Media Activity, can compete in the Defense Media Merit Awards (DMMA) competition. Winners of the DMMA contest also compete in the Defense Media Awards competition.

Submissions for the contests should have been uploaded and published to the Defense Video and Imagery Distribution System (DVIDS) by Dec. 31, 2017, to be eligible; however, entrants have until the deadlines set by each Services' competition to submit entries. Public affairs and visual information professionals should contact their Service competition points of contact for more information. Detailed information on the Defense Media Awards may be found at: http://www.dma.mil/Services/Defense-Media-Awards/.

Active, veteran USAF ComCam Airmen share experiences

By Stephen Faulisi, DIMOC-Joint Combat Camera Center

The U.S. Air Force Combat Camera Association held its 14th annual Combat Camera Reunion Oct. 12-15, 2017, in Colorado Springs, Colorado. The reunion is held each year at various locations across the U.S. for current and former Airmen who served in the 600th and 601st Photo Squadrons, the Aerospace Audiovisual Squadrons and Combat Camera units. Attendees reminisced, rekindled long-standing friendships and promoted camaraderie between active and retired members of the Combat Camera community.

Active-duty Airmen assigned to the 1st Combat Camera Squadron, based at Joint Base Charleston, S.C., hosted the 2nd Annual Combat Camera & Storytelling Workshop in conjunction with the reunion. While the active-duty Airmen demonstrated their skills, they had the opportunity to compare notes with and learn from the experiences of their predecessors.

Steve McGill and Dennis Martin, multimedia managers with the Defense Visual Information Records Center in Riverside, California, also briefed the reunion attendees on DIMOC’s physical media digitization and archiving program. McGill and Martin also invited the retirees and veterans to contact DIMOC with relevant physical media, such as slides, films or prints, from their time in service. Such media can be brought into the archives for digitization and release to the public, making more of America’s military history available to the coming generations.

For more on DIMOC’s ongoing physical media preservation efforts and how to submit physical media for digitization, go to http://www.dimoc.mil/quick/physicalimagery.html.
DIMOC resumes film transfers to NARA

Staff Report

In October 2017, Defense Visual Information Records Center in Riverside, California, began the process of transferring more than 7,000 individual 16 mm and 35 mm motion picture films to the National Archives and Records Administration. The films, mostly produced by the Army, Air Force and Navy, represent the first film transfer to NARA since 1998.

All of these films have been digitized and are available within Defense Visual Information Archive (DVIA), which can be found at http://www.dimoc.mil/quick/physicalImagery.html.

Only physical VI records determined permanent according to the DoD VI Records Schedule are digitized and provided digitally to the Department via the DVIA.

After digitization and curation, these permanent records are then scheduled for transfer to NARA. The digital file will also be transferred to the National Archives for greater access by the general public. The 7,000 films are in the process of being shipped to NARA. The first shipment, in November, was cause for celebration at Riverside (Figure A).

DIMOC’s comprehensive workflow overhaul is successfully repairing the former reputation of being a “black hole” for VI records.

Over the next five years, DIMOC will continue to improve and streamline its processes, including full resumption of regular transfers to NARA.

VI UPDATES

VI POLICY

First Quarter, Policy Actions

–No substantive changes: Issuance brought into WHS compliance with corrections to various policy references

The Limitations for Public Use language can be viewed on the DIMOC website at: http://www.dimoc.mil/resources/limitations.html

Under Development

DoDI 5040.02 “Visual Information” The upcoming revision will add new policy on personal cameras, required VI documentation, VI as public information, and incorporates and cancels DoDI 5040.07 “VI Productions.”

New Issuance Section Headings:
- Section 1: General Issuance Information & Policy
- Section 2: Responsibilities
- Section 3: Governance, Committees & Working Groups
- Section 4: Required VI Documentation
- Section 5: Use of Personal Equipment to Capture Mission-Related Imagery
- Section 6: VI as Public Information
- Section 7: VI Attribution and Metadata
- Section 8: Video Productions
- Section 9: Combat Camera
- Section 10: Prohibited Alteration of DoD Imagery

The most current version of DoDI 5410.20 “Public Affairs Relations with for Non-Profit Business and Business Industry Organizations” (Change 1) is available for download here: http://www.dtic.mil/whs/directives/corres/pdf/541020p.pdf

DoD VI Style Guide Updates

VI Style Guide
Work is starting on the next edition of the Visual Information Style Guide (VISG), set for release July 1. The Visual Information Editorial Board voted last year to set July as the standard release date for annual VISG updates.

If you have items you would like to see added, clarified or updated in the VISG, please contact DIMOC Lead Writer-Editor Thomas Ruyle at thomas.m.ruyle.civ@mail.mil, or call 301-222-6209.

VI Style Guide mobile app
After a number of technical issues, the app is in the final stages of development. We’re working on a full review of the content and ironing out some last-minute problems. We’ll make an announcement via dimoc.mil and our Facebook page one to two weeks before we make the app available in early 2018.

DIMOC website migration
The dimoc.mil website is being migrated to the AFPIMS web hosting manager in early 2018.

The new site will incorporate new functionalities, such as a news blog, training videos and a user-friendly organization. After the site is built and field-tested, we hope to debut the new dimoc.mil by April 1.

Questions, comments or feedback? Email DIMOC at dma.dvi.dimoc@mail.mil.
